Amazon (Robotics),
Canvas Technology (Before March 2019)
Boulder, CO

- Working on designing and developing user experiences for human-robot interactions and their control interfaces.
- Utilizing an array of bleeding edge technologies and workflows to deliver results.
- Working in an Agile environment.
- Using CI/CD pipelines for automated versioning and deployments.

Worked With: React, React Native, Phoenix, Elixir, CSS3, HTML5, Android SDK, Node, Websockets, Jenkins, Jira

May 2016 - October 2018

Full Stack Software Engineer

Armstrong Steel Corporation, Englewood, CO

- Created a web based intranet system to replace and combine different third party systems to create a more efficient workflow for departments.
- Worked with bleeding edge technologies. Tried to use the best tool for the specific job.
- Added integrations with third party enterprise services like Salesforce, Google Apps, DocuSign and more.
- Migrated 6 years worth of company data from Salesforce to an in-house application.
- Managed internal development and production servers and created auto deployment system for them.
- Created automation systems for repeated tasks within the company to save costs and time.
- Automated workflows of a whole department taking response time from few days to few minutes while saving the company millions per year in overall costs.

Worked With: .NET Core, ASP.NET Core, Angular, React, Node.js, Entity Framework, Bootstrap, Semantic UI, Salesforce, Apex and more.

October 2010 - Present

Full Stack Software Developer (Founder)

FriDev LLC, Denver, CO

FriDev is my own company that I do my freelance work through.

- Worked with clients ranging from individuals to local businesses to enterprises to deliver custom built web and mobile applications per requirements.
- Worked with a lot of technologies including but not limited to Javascript, Golang, iOS / Android SDK, Ionic Framework, AngularJS, ReactJS and Redux, Laravel, Wordpress etc.
- Got experience with client management, customer service, project scoping and planning and a lot more.

Worked With: Javascript, Golang, iOS / Android SDK, Ionic Framework, AngularJS, ReactJS and Redux, Laravel, Wordpress, React Native, ASP.NET Core and more.

October 2013 - November 2015

Full Stack Web Developer

iScene LLC, Boulder / Denver, CO

Built a web based collaboration platform for students on K-12 educational institutions. The project got a National Science Foundation grant.

- Used technology stack that includes AngularJS, Laravel Framework, PHP, NodeJS, Golang, Redis, MySQL and more for different purposes.
- Designed, implemented and tested the full stack of the project and launched a pilot program to test the platform with a small team with constant collaboration.

Worked With: AngularJS, Laravel (PHP), Node.JS, GoLang, Redis and more.
